INTRODUCTION

The existing « Serie 2067 »

2067 is a set of artistic propositions by David Guez (installations, websites, objects) about time, memory and our collective and intimate relationship with these issues through social networks and new technologies.

EMAIL 2067: An innovative website created to send an e-mail by day in the future between tomorrow and... 2067

RADIO 2067: A radio with a time line to listen music from 1900 to 2012.

TEL 2067: A network of booths and handsets installed in public spaces to leave voice messages in the future.

CLOCK 2067: A clock that permanently records sound space environment. The movement on the hands guides you back to listen the past sequences. One is shown in La Gaité Lyrique, Paris.

These projects has been shown in numerous art festivals and art centers.

CAMERA 2067
Visual and Temporal reflector

The camera 2067 is a device - a camera - that allows to take photographs that are sent immediately on the Internet – the Cloud 2067 - where they are stored to be revealed in the future from tomorrow until 12/31/2066 : The photographs do not stay in the unit and are never visible at the time of shooting.

The Camera 2067 is seen as an intimate object, a black box for relay transmission between the present and the distant future, a reflector time where the Internet becomes the guarantor of memory saved and restored in time.

The Camera 2067 is a real camera with the Android Operating system included and Wifi and 3G connection. An application has been developped in order to be installed in the camera unit.

THE CAMERA

The Camera 2067 is a real camera with the Android Operating system included and Wifi and 3G connection. An application has been developped in order to be installed in the camera unit.
The CAMERA 2067 has 3 modes :

The 'Private Mode' : Send a photography to a particular person via the email.

The 'Public mode' : The pictures are sent to the public part of the Cloud 2067: during their revelations date, they are visible by everybody on the website www.cam2067.net

The 'after life mode' : Pictures are send on a web site « www.audela.me » where they never can be seen by living people : this mode develop the idea that when we die, our spirit is able to move inside the network. On the other side, we will construct a mirror, the mirror 2067 which show pictures from the audela website which has been visited by the fantoms and web robots.

The CLOUD 2067 is a web server that handles the storage and retrieval of temporal visual elements.
